

AN AI POWERED SOFTWARE-BASED FIRE DETECTION SYSTEM FOR CCTV PLATFORMS.

FiremeX - TEST CASES

AUTOMATION

Document ID	QA-AUTOMATION 01
Project	FiremeX
Tool	Selenium
Language	Python
Prepared By	Jayashini Jayaweera

Test Case ID	Title	Precondition	Test Steps	Expected Result	Priority	Test ID	Test Result
TC_AU TH_01	Verify input placeholders match format and accept dynamic personname@companyname.com emails	Web browser open, navigated to http://localhost:5174/	1. Locate Email and Password fields 2. Verify placeholders match name@company.com and Enter Password 3. Verify initial fields are empty 4. Enter test emails (johndoe@acmecorp.com, sarahconnor@safetysolutions.com, operatoralex@firemex.com) and check input value & regex format	Input fields display correct placeholders, start empty, and accept valid dynamic email addresses matching regex pattern	High	TC-AU TH-01	PASS
TC_AU TH_02	Verify toggling password visibility eye icon	User is on Login Page (http://localhost:5174/)	1. Locate Password input field 2. Check initial type attribute (password) 3. Click the password visibility eye icon button 4. Check updated type attribute	Password input type attribute toggles (e.g. from password to text), making password text visible/hidden	Medium	TC-AU TH-02	PASS

TC_AU TH_03	Fill dynamic email & password, submit login form and verify navigation	Valid user credentials exist (admin@fireme x.com / password123)	1. Enter valid email and password 2. Click 'Sign In' button 3. Wait for URL change or error alert	User is successfully authenticated and navigated to Dashboard (/FiremeX/admin/dashboard/) or an error message is displayed	High	TC-AU TH-03	PASS
TC_AU TH_04	Verify link under submit button is clickable and navigates to register page	User is on Login Page (http://localhost:5174/)	1. Locate 'Request access' / 'Register' link under submit button 2. Verify link is visible and enabled 3. Click the link 4. Verify target URL	Register link is clickable and redirects user to the Register page (/FiremeX/register)	Medium	TC-AU TH-04	PASS
TC_AU TH_05	Verify input fields visibility and clickability	User is on Login Page (http://localhost:5174/)	1. Check visibility of Email and Password input fields 2. Check if both fields are enabled 3. Click Email field and verify focus 4. Click Password field and verify focus	Both Email and Password input fields are visible, enabled, clickable, and receive active element focus	High	TC-AU TH-05	PASS

TC_AU TH_06	Verify submit button visibility and clickability	User is on Login Page (http://localhost:5174/)	1. Locate the 'Sign in' submit button 2. Check visibility and enabled status	Submit button is visible, clickable, and enabled for user interaction	High	TC-AU TH-06	PASS
TC_AU TH_07	Email is Invalid & Password is Valid -> Verify error message displayed	User is on Login Page (http://localhost:5174/)	1. Enter invalid email (invalid_email@wrongcompany.com) 2. Enter valid password (password123) 3. Click 'Sign in' 4. Verify UI response	Login fails, error message is displayed (text-red-500), and user remains on login page	High	TC-AU TH-07	PASS
TC_AU TH_08	Email is Valid & Password is Invalid -> Verify error message displayed	User is on Login Page (http://localhost:5174/)	1. Enter valid email (admin@firemex.com) 2. Enter invalid password (wrong_password_999) 3. Click 'Sign in' 4. Verify UI response	Login fails, error message is displayed (text-red-500), and user remains on login page	High	TC-AU TH-08	PASS

TC_AU TH_09	Email is Invalid & Password is Invalid -> Verify error message displayed	User is on Login Page (http://localhost:5174/)	1. Enter invalid email (fake_user@fake_domain.com) 2. Enter invalid password (fake_password) 3. Click 'Sign in' 4. Verify UI response	Login fails, error message is displayed (text-red-500), and user remains on login page	High	TC-AU TH-09	PASS
