AN AI POWERED SOFTWARE-BASED FIRE DETECTION SYSTEM FOR CCTV PLATFORMS.

FiremeX - TEST CASES

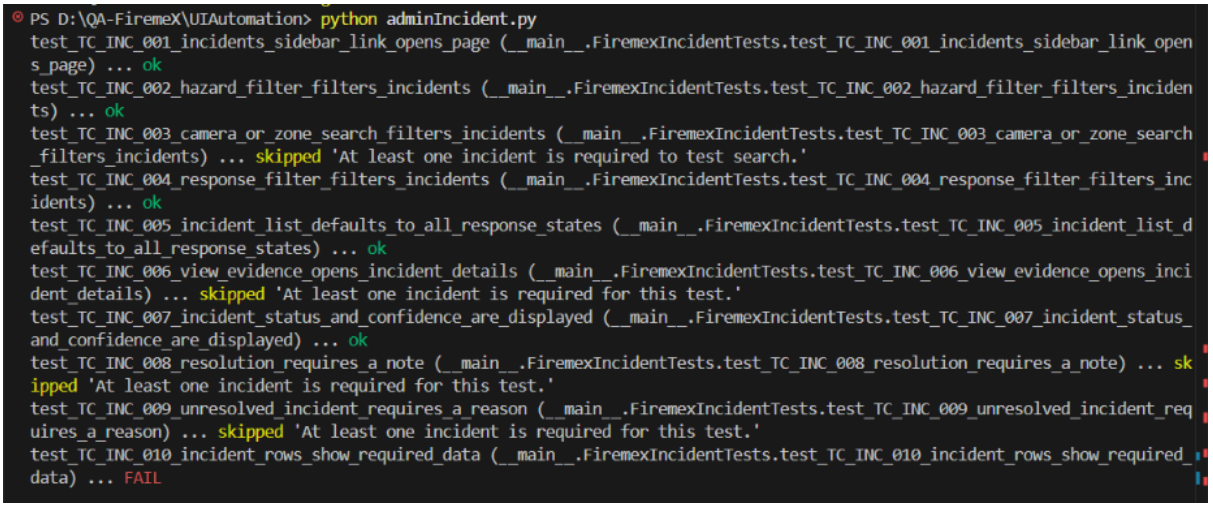

AUTOMATION

Document ID	QA-AUTOMATION 06
Project	FiremeX
Tool	Selenium
Language	Python
Task	UI Testing Admin Pages
Prepared By	Jayashini Jayaweera

Test Case ID	Test data	Expected result	Test Status
TC_SET_001	Organization settings page	Name, Sector, and Contact email fields are populated; the Country selector is visible.	Passed
TC_SET_002	Existing organization name; temporarily append Test	Updated organization name saves successfully and “Organisation updated.” appears. The test restores the original name afterward.	Passed
TC_SET_003	Organisation settings card	Save changes button is visible and enabled.	Passed
TC_SET_004	Operator join code card	A non-empty join code is displayed and has finished loading (not ...).	Passed
TC_SET_005	Your team card with loaded counts	Two numeric counts are displayed, with labels for Active and Awaiting approval.	Passed
TC_SET_006	Monitored cameras card with loaded counts	Total camera and AI-enabled counts are numeric; total cameras is greater than or equal to AI-enabled cameras. Both labels are displayed.	Passed
TC_SET_008	Settings sidebar item	The Settings item has active styling, including border-l-4 and text-accent classes.	Passed
TC_SET_009	Displayed organization join code; clipboard permissions granted	Clicking Copy changes the button to Copied, and the clipboard contains the displayed join code.	Passed

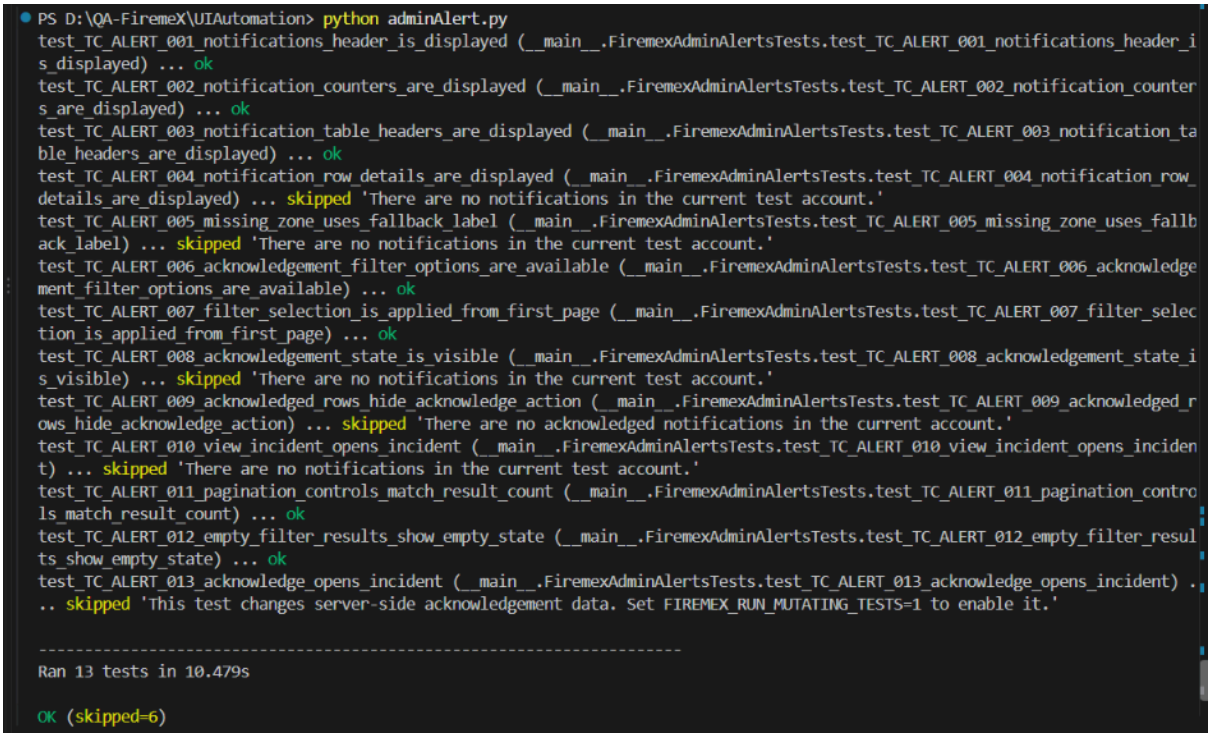

Test Case ID	Test data	Expected result	Test Status
TC_INC_001	Click the Incidents sidebar link	The app opens /admin/incidents and displays the Incidents heading.	Passed
TC_INC_002	Set Hazard class to Fire	Only incident rows with Fire detections are displayed.	Passed
TC_INC_003	Search using a camera or zone name from an existing incident row	Results are filtered to matching camera/zone entries.	Skipped
TC_INC_004	Set Response status to Resolved	Only incident rows with Resolved response status are displayed.	Passed
TC_INC_005	Open Incidents without changing filters	Hazard and Response filters default to All; displayed rows contain incident reference, detection, and camera/zone data.	Passed
TC_INC_006	Click View evidence for the first incident	A detail dialog opens for the selected incident and shows detection details and captured evidence.	Skipped
TC_INC_007	Incident records with response status and confidence	Each displayed row has a supported response status (Unresolved, In Progress, or Resolved) and confidence formatted as a percentage.	Not Run
TC_INC_008	Eligible incident; select Mark resolved, then save without a note	The incident is not resolved; validation displays “Enter a resolution note.”	Skipped
TC_INC_009	Eligible, unresolved incident; select Keep unresolved, then save without a reason	The incident remains unresolved; validation displays “Enter a reason.”	Skipped
TC_INC_010	Incident table with one or more rows	Here are the test cases based on adminIncident.py. Common precondition: the app is running and an admin is signed in to the Incidents page. Test Status is “Not Run” because these cases are documented from the script, not executed here.	Failed

Test Case ID	Test data	Expected result	Test Status
TC_ALERT_001	Open the Notifications page	Page heading and response guidance (“Response Queue” and “Acknowledge a detection”) are displayed.	Passed
TC_ALERT_002	Loaded notification data	Total and Unacknowledged counters display numeric values; the unacknowledged count does not exceed the total.	Passed
TC_ALERT_003	Notification table	Table displays Notification / detected, Detection, Camera / zone, Confidence, Acknowledgement, and Action columns.	Passed
TC_ALERT_004	At least one notification	A notification row identifies Fire or Smoke, shows a confidence percentage, and displays its acknowledgement status.	Skipped
TC_ALERT_005	Notification with no zone	The row displays the fallback text “Zone not set.”	Skipped
TC_ALERT_006	Acknowledgement filter	Filter offers All notifications, Needs acknowledgement, and Acknowledged options.	Passed
TC_ALERT_007	Select each filter: All, Needs acknowledgement, and Acknowledged	The selected filter is applied, its value is retained, and pagination returns to Page 1.	Passed
TC_ALERT_008	One or more notification rows	Each row visibly indicates “Not acknowledged” or “Acknowledged by” a user.	Skipped
TC_ALERT_009	Acknowledged notifications	Rows do not show an Acknowledge button and provide a View incident action.	Skipped

TC_ALERT_010	Notification with an incident; click View incident	App navigates to /admin/incidents with an incident reference in the URL.	Skipped
TC_ALERT_011	Notification list with one or more pages	Pagination shows the current page and total pages. Previous is disabled on page 1. Next is disabled for one page; otherwise, Next opens page 2 and Previous becomes enabled.	Passed
TC_ALERT_012	Apply Acknowledged filter when it returns no results	Empty state displays “No notifications match this view” and “New detections will appear here as they arrive.”	Passed
TC_ALERT_013	An unacknowledged notification; set FIREMEX_RUN_MUTATING_TESTS=1	Clicking Acknowledge navigates to /admin/incidents with an incident reference in the URL. This test modifies server-side acknowledgement data.	Skipped

Test Case ID	Test data	Expected result	Test Status
TC_PROF_001	Open the Profile page	Profile heading and “Your account and organisation” subtitle are displayed.	Passed
TC_PROF_002	Signed-in admin’s account	Display name and email are visible; avatar initials match the first letters of the first two name parts.	Passed
TC_PROF_003	Signed-in admin account	Identity section displays the Administrator role and an account status of Active or Pending.	Passed
TC_PROF_004	Your organisation section	Name, Sector, Contact email, Phone, and Country are displayed as read-only details; no editable inputs, selects, or text areas are present.	Passed
TC_PROF_005	Account section	Member since value and Display name field are visible; the member-since value is populated.	Passed
TC_PROF_006	Display name containing only a space	Saving is rejected with “Please enter at least 2 characters.”	Passed
TC_PROF_007	Change display name to Selenium Profile Test	Name saves successfully, “Name updated.” appears, and the original name is restored after the test.	Passed
C_PROF_008	Current password, New password, Confirm new password fields	All password fields are visible and mask typed characters; Update password button is displayed.	Passed
TC_PROF_009	New password 12345; matching confirmation	Password update is rejected with “The new password must be at least 6 characters.”	Passed
TC_PROF_010	New password NewPassword123; confirmation DifferentPassword123	Password update is rejected with “The two new passwords do not match.”	Passed
TC_PROF_011	Dedicated test account; current and temporary passwords configured using FIREMEX_TEST_CURRENT_PASSWORD and FIREMEX_TEST_NEW_PASSWORD	Password changes to the temporary password and is restored to the original; password fields clear after each successful change.	Passed

```
